

PROFESSIONAL BACHELOR PROGRAMME IN NUTRITION & DIETETICS

UNIVERSITY COLLEGE LEUVEN-LIMBURG (UCLL)

Internationalization is our core business. We create an international campus among others by attracting students for our degree and exchange programs. More than 500 young people with an international background already study with us. Almost the same number visits us annually for a short or long exchange program.

The attraction of student cities such as Leuven is their small format and the safe, green surroundings. Our campuses are situated at the heart of Europe. With fast and easy access to our surrounding countries and either the sea and hilly regions and with an overwhelming offer of festivals, performances, cultural centers or museums, you will find it impossible to be bored.

Are you convinced that a study in Flanders will advance your career and life? We have a number of options to offer you as a degree student or as an exchange student.

BECOMING A NUTRITION & DIETETICS STUDENT IN LEUVEN

If you are looking for a life-changing experience as an **exchange student**, UC Leuven-Limburg may be exactly what you are looking for. For Nutrition and Dietetics we have developed an Autumn-semester exchange program in English. In Spring we welcome those students who want to undertake a traineeship in combination with a research project. Every semester starts with an introduction week for exchange students. You are most welcome to participate in this program as an **Erasmus or exchange student** or as a **free mover student** at the Health campus of the faculty of Health in Leuven.

The program offers a selection of our regular scientific education program with a broad curriculum providing students with the theoretical knowledge and practical skills to graduate as excellent dietitians.

Our English study program gives you the insight of the composition of food and its influences on health and illness. Our students learn to analyse nutritional requirements and to deal with evidence-based applications, such as applying results of scientific literature into practical advices for clients and patients. In this, theory and practice go hand in hand.

UC Leuven-Limburg offers also a number of general-courses which are of general interest to all exchange students. Each of those open courses can be included in your study program - The aim is 30 credits/semester
